WORK EXPERIENCE

VIETMAP - Company

Dec 2022 - present | *Front-end Developer*

1. Fleet Management

Project-Description: The web application for the management and monitoring of vehicle fleets includes the following features: reports, monitoring, history, user management, warnings, geofencing, point and geofencing, driver management, service subscription, and location sharing. It also offers real-time data visualization and analytics technology.

Technology: ViteJS-React, TypeScript, Mantine, DevExpress, Leaflet, React-Leaflet, Tanstack-query, Zustand, UnoCSS, I18n

Team-size: 7

Responsibility:

- Researched technologies and set up the base source code
- Successfully applied Module Federation to the project
- Implemented and maintained the system, ensuring code quality through regular reviews
- Optimized large dataset rendering in Leaflet and Table UI using clustering, grouping, virtualization, pagination, and lazy loading
- Led a small team: delegated tasks, provided support, conducted code reviews, and resolved individual issues

2. Billing System

Project-Description: A web application for managing and monitoring the billing system of the company, including features such as client, customer services, documents, devices, promotions, payment management and financial reporting.

Technology: Vue JS, Quarsar, Chart JS, Axios, Vuex, Vue Router, XLSX

Team-size: 4

Responsibility:

- Implemented and maintained the system, ensuring code quality through regular reviews
- Supported the sales team and billing team by gathering, evaluating, and offering solutions for their requirements
- Built source through quarsar and deployed it to a server using S3 bucket
- Developed a billing system for the company, including features such as services management, payment tracking, and financial reporting by using tables and charts

3. VM-Support 2.0

Project-Description: A web application for managing and monitoring vehicle devices support sending commands and receiving data from devices.

Technology: ViteJS-React, TypeScript, Dev Extreme, Leaflet, React-Leaflet, TaiwindCSS, Zustand, Tanstack-query

Team-size: 6

Responsibility:

- Implement and maintain the system, review and assure quality of code
- Support gathers, evaluates, and offers solutions for the sales team's requirements
- Building an image with Docker and deploying it to a server with K8s

4. Camera Monitoring

Project-Description: A web application for monitoring and managing camera devices, providing real-time video streaming and analytics.

Technology: ViteJS-React, TypeScript, Mantine, Antd, Zustand, Tanstack-query, UnoCSS

Team-size: 6

Responsibility:

- Maintain system, review and assure quality of code.
- Fix issues remain exist in previous version.
- Develop new features and improve performance of the system.

KMS - Technology

Dec 2021 - Nov 2022 | *Software Engineer*

1. GoodHuman Web App

2. Shout for Good Web App

GitGam - Company

Mar 2021 - Dec 2021 | *Front-End Develop*

1. Enterprise management software WebApp

SKILL

HTML	- Good knowledge about HTML5, HTML Semantic. - Optimize SEO for the website.
CSS	- Good knowledge about CSS3, Flexbox, Grid. - Understand the concepts of BEM, AtomicCSS, Responsive. - Have experience working with Bootstrap, Tailwind CSS, UnoCSs, Ant-Design, MantineUI, DevExpress - Have experience in many UI libraries for Data Table and Virtualization: DevExpress, Ant-Design, Tanstack-Table, Tanstack-Chart, Recharts, ChartJS
Javascript & Typescript	- Have knowledge about Javascript basics, ES6. - Have knowledge about Javascript Advanced Concepts: Promise, Asynchronous, Event Loop, Closure, Functional Programing, WebAPI. - Have knowledge and have experience working with Typescript. - Have experience building Javascript/Typescript Library. - Understand and experience in Reactive Programming with RxJS
React JS	- Have knowledge about ReactJS Basic & Advanced: HOC, React Hooks, Memoization, Testing. - Atomic Design Pattern. - Have experience building React UI Core Component, React Library. - React's Ecosystem: React Router, Redux, Zustand, Tanstack-Query, Storybook, NextJS...
Testing	- Have experience writing Unit and Integration Testing. - Testing's Ecosystem: Jest, Vitest, React Testing Library, Enzyme.
Tools	- Have knowledge about configuring & optimizing Webpack, plugin. - Other tools: ViteJs, Figma, Bitbucket, Jira, Confluence, Github, Github Action. - Have experience working with CI/CD, Docker, Nginx, AWS, K8s, Jenkins.
AWS Cloud	- Have knowledge and experience in AWS web services - Services used: IAM, S3, VPC, EC2, CloudFront, RDS, Route53, CloudWatch, Lambda, EKS, ECR.
